## Downloading - what formats are supported? What tips and tricks are there?

By clicking on a news item, an image or a graphic you can download it directly onto your hard drive from the results list or from the detailed view of a document. Before you can download several items from the results list at a time you must tick the appropriate boxes. Using the function download you can then choose from a selection of download formats.

Documents can also be downloaded from the detailed view but in this case only the document currently being viewed can be downloaded at one time.

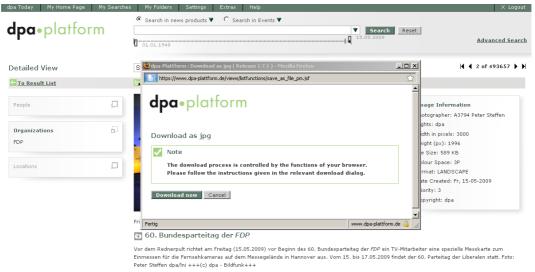

The download formats depend on the type of media to be downloaded. If documents containing a number of formats are to be downloaded these will only be available in the detailed view in the category: As Originalformat in a ZIP file.

### Service

#### Tips and Tricks

The download process is controlled by the functions of your browser. It is important to enable pop-ups otherwise the window you need in order to download will not be displayed.

Please note that in the case of pictures and graphics these can only be downloaded in high-resolution Original Format.
